-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

### Status

- 1) ☒ Responsive to communication(s) filed on 30 August 2005.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Paper No(s)/Mail Date. \_\_\_\_\_.
- 5) ☐ Notice of Informal Patent Application
- 6) ☐ Other: \_\_\_\_\_.

### **DETAILED ACTION**

Claims 1-3 are presented and represent all of the claims under consideration.

#### ***Priority***

This application is the National Stage filing of International Patent Application No. PCT/SE03/01131, filed 27 June 2003. Applicant claims priority to Swedish Foreign Application No. 0202081-6, filed 3 July 2002. Examiner finds that Applicant's filing meets the priority requirements and determines the earliest effective U.S. filing date to be 3 July 2002.

#### ***Information Disclosure Statement***

An Information Disclosure Statement filed 30 December 2004 is acknowledged and has been reviewed.

#### ***Specification***

The abstract of the disclosure does not commence on a separate sheet in accordance with 37 CFR 1.52(b)(4). A new abstract of the disclosure is required and must be presented on a separate sheet, apart from any other text.

***Claim Objections***

Claim 2 is objected to because of the following informalities: the word “adsorb” is a misspelling. The term should be corrected to read: “absorb”.

The Examiner is well aware of the definitions of and difference between the two terms. Further review of Applicant’s specification reveals that support is lent to the latter term rather than the former.

Appropriate correction is required.

***Claim Rejections - 35 USC § 112***

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter, which the applicant regards as his invention.

Claims 1-3 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The metes and bounds of the recitation “such as glutathione and N-acetylcysteine”, in claims 1-3, cannot be precisely determined. Applicant should recite those compounds contemplated. The description of examples or preferences is properly set forth in the specification rather than in the claims (MPEP 2173.05(d)).

***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

Art Unit: 4133

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1 and 2 are rejected under 35 U.S.C. 102(b) as being anticipated by Bolton et al. (U.S. Patent 4,784,653).

Bolton et al. teaches an absorbent adhesive dressing intended for treating wounds such as ulcers or burns (Abstract). A general method for preparing a layered dressing is taught whereby an enzyme is either applied to the dried, adhesive surface of a prepared layer of fibers and resealed under a release liner, or whereby the dressing already contains the enzyme and is then sealed in a waterproof container (column 6, lines 9-31). N-acetylcysteine is taught as one of the enzymes useable in the dressing (column 4, line 66 to column 5, line 6). Therefore, the reference teaches each and every one of the limitations.

Claims 2 and 3 are rejected under 35 U.S.C. 102(b) as being anticipated by Durif et al. (U.S. Patent 5,939,094).

Durif et al. teaches water-soluble gel compositions as dosage forms for the transdermal administration of apomorphine (Abstract). Example 8 teaches an embodiment of the transdermal patch whereby glutathione is an antioxidant added to an emulsion of apomorphine HCl and acrylic acid polymer gels in order to stabilize said emulsion. Therefore the reference teaches each and every one of the limitations.

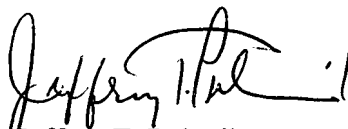

No claims are allowed.
